# Vivian Lopes

Driven Software Engineer Seeking Innovative Opportunities in Tech  
United Kingdom

## Summary

Forging a path from hands-on roles in refrigeration and sales consultancy, where teamwork and networking were key, I am now channeling my lifelong fascination with computers into a career in software engineering. After completing an intensive 12-week bootcamp focused on React, Express, Node.js, Python, and Django REST, I have gained a solid foundation in modern software development.

My passion for technology integration and creative problem-solving stems from my hobby of FDM 3D printing, which played a crucial role in inspiring my transition into software engineering.

When I'm not coding, you'll find me tinkering with automotive projects, jamming on my guitar, or exploring the latest tech trends.

---

## Experience

### General Assembly

#### Software Engineering Graduate

March 2024 - June 2024 (4 months)

London

Completed an intensive 12-week program focusing on React, Express, Node.js, Python, and Django REST. Please see the project section below to review my accomplished projects.

### Arcus FM

#### Maintainence Operative

July 2022 - February 2024 (1 year 8 months)

Stevenage, England, United Kingdom

To me refrigeration case cleaning is not just about the task at hand, but also about the ability to deliver consistent quality, work well with others, and adapt to various work environments. Below are the key highlights of my role:

- Uphold the highest standards for refrigeration case cleanliness, ensuring a pristine presentation every time.
- Thrive in a team environment, contributing to efficient and harmonious service delivery.
- Drive safely and in a timely manner across the country to various locations, providing consistent and thorough cleaning services wherever needed.
- Develop and build up the role through active training measures provided by Arcus.

## OneFamily

### Sales Consultant

October 2021 - June 2022 (9 months)

Swindon, England, United Kingdom

- Promoting and selling a range of financial products and services to existing customers.
- Providing a brief assessment to customer on their investments with OneFamily.
- Making calls, sending out emails, and connecting with our current database of customers to expand their investment potentials.
- I work to understand the financial needs of these potential clients and communicate how our offerings can address those needs effectively.

## Space Engineering Services Ltd

### Maintenance Engineer

February 2019 - October 2021 (2 years 9 months)

Bristol, England, United Kingdom

## Catalent Pharma Solutions

### Production Technician

December 2017 - February 2019 (1 year 3 months)

Swindon

- Operating and maintaining machinery and equipment in a manufacturing or production environment.
- Ensuring that production processes run smoothly, monitoring equipment performance, conducting routine maintenance, and troubleshooting any issues that may arise.
- Meeting production goals and maintaining product quality.

---

## Education

## General Assembly

Computer Software Engineering · (April 2024 - June 2024)

## St. Xavier's College

Bachelor of Business Administration (B.B.A.), Business Administration and Management, General · (2011 - 2014)
